

Corporate and Charity Golf Outings

Making amateur golfers feel like PGA Tour pros since 1999, eGolfScore is the leader in leveraging the power of digital media, real-time wireless communications and the world of golf for individual golfers as well as corporate, celebrity and charity golf outings across North America, Europe and Australasia.

Add Fun, Increase Competitive Spirit with Real-Time Wireless Scoring.

Handheld wireless scoring devices, big-screen TV leaderboards and Internet broadcast of amateur golf outings around the world comprise eGolfScore's real-time wireless Event Scoring Program (eSP).

TV Leaderboards on the Course

- One **wireless scoring device** for each group, including a real-time leaderboard on each handheld device to increase the competitive spirit throughout the round. No more tallying scorecards and waiting for results!
- **Big-screen TV leaderboards** placed around the golf course and at the club house for all to view a real-time leaderboard for all formats (e.g., scramble gross, scramble net), team/player photographs (if included), hole statistics (e.g. avg. number of strokes) and sponsors
- **LIVE Internet broadcast** of the event within the popular View an Event Live section of the eGolfScore web site. Friends, family and co-workers unable to be at the event can "watch" the scoring in real-time, view player photos AND click through to sponsor web sites.

Unique Sponsor Recognition Guaranteed to Delight!

Delight your sponsors with the good news that the eGolfScore Media Delivery System (eMDS™) will give them unprecedented exposure to a highly-desirable target audience in a very engaging, interactive environment.

- Presenting sponsors are prominently displayed on the big-screen TV leaderboards on the golf course (throughout the entire round) and within the View an Event Live section of the eGolfScore web site for several years!
- Up to 54 hole sponsors receive targeted exposure on the big-screen TV leaderboards as "all eyes" at the event are on the leaderboards. Web site exposure drives traffic to hole sponsor web sites long after the event.
- Text messages (one per hole) on the wireless scoring devices enable sponsors to send well wishes, special offers or promote new products to all participants.
